

THE PORN RESISTANT BRAIN

The latest research indicates exposure to porn happens by age 8 (that's 2nd grade!) It's often unintentional, even accidental, but once seen it can never be unseen.

The physiological change which happens in the brain as a result of that first exposure fosters the desire to see more. The reality is even the most vigilant parent CANNOT prevent a porn infiltration indefinitely. Trying to delay it by blocking every portal where the sludge of porn can seep in, has little chance of success. There is just too much, and it's too easily accessible.

If blocking and filtering aren't enough, you might ask, then how can a responsible parent or caring adult equip youngsters to avoid porn? By training the brain to *WANT* something different, something **better**.

Positively Waiting is hosting four opportunities this summer to sample that exact training, and connect with resources that work. These seminars will be appropriate for both adults and teens (use discretion with younger children). Hopefully, at least one venue is near you!

HOW MUCH INTERNET PORN IS THERE?

This Month's Coaching Exercise

In preparation for attending **THE PORN RESISTANT BRAIN** seminar, here are a few ways to start a discussion about the culture and pornography.

If every pornographic image viewed in a single day from just one of the most popular websites was printed out on 8.5x11 paper, it would fill the Empire State Building.

1. The culture depicts the porn industry as glamorous and exciting. So then why do most porn stars have to be high or coerced in order to perform?
2. In the movies where a character takes a beating, the acts depicted are simulated (sometimes computer generated.) But in pornography, the brutality and humiliation happens to a real person. There is no "stand in" or stuntman. What affect do you think that would have on a real person's physical or emotional health?
3. The argument for viewing porn it is "victimless." However, the demand for more, different, and new participants is the driving force behind human sex trafficking. How much responsibility does the porn **consumer** carry for those victims?

Remember, *the ANSWER isn't as important* as the conversation! Just thinking and talking about it will help develop the neural network associated with decision-making. The answer will most likely change over time anyway.

The amount of video porn distributed in a month from one porn site would be the equivalent of **58,000 years** of music played *continuously*.

The combined total of videos viewed from all porn sites in **ONE DAY** is **17,291,480,548 (Billion!)**

The combined total of videos viewed from ALL porn sites watched in **ONE YEAR** is **6,311,390,400,000 (Trillion!)**

Think of it this way...

A million seconds is **13 days**.

A billion seconds is **31 years**.

A trillion seconds is **31,688 years**.
